NDC
CONVERTER

## ACCELERATES MIGRATION PROCESS FROM SAP BUSINESSOBJECTS TO SAP ANALYTICS CLOUD.

Migrate your BusinessObjects content to SAP Datasphere and SAP Analytics Cloud efficiently - significantly reducing manual effort and overall migration project complexity with automation.

www.ndcgroup.com

Up to 70% automation of the manual and time-consuming migration effort

Migrating hundreds or thousands of BO Web Intelligence reports to SAP Analytics Cloud (SAC) would mean thousands of hours of manual effort. It almost seems such migration is not possible at enterprise scale, needs larger human capital investment and have long lead time to business outcomes. NDC together with SAP product teams developed a light-weight Converter that cuts the manual effort by up to 70%, delivering first reports in SAC within weeks. The Converter reads dimensions, measures and reports structures via public API (BO 4.2+ is required), transforms data, and leveraging RPA technology recreates the reports in SAC. The entire process is governed by NDC migration experts ensuring business outcomes are delivered - a working report with the right data ready for a business user.

NDC CONVERTER for BusinessObjects

Report migrated in 45 seconds

SAC skilled expert – report migrated in 2 hours & 2 coffees consumed

Business outcomes

Fast and cheap feasibility and approach confirmation. The first Web Intelligence reports are migrated to SAP Cloud Analytics within 2 weeks of the activity initiation.

Makes migration possible at enterprise scale - saves on average 1h on Web query document migration and 2hours on report - expected savings at enterprise scale in hundreds of man days.

Delivered as part of overall migration engagement - NDC migration experts fine-tune reports, adjust calculations to achieve 1:1 parity with existing BusinessObjects content.

Key features

SAP Web Intelligence
query documents are automatically migrated as remote tables in SAP DataSphere

Scale to large enterprise environments
size of hundreds of Universums and thousands of reports

**Easy installation into your existing SAP environments.**
Runs as a desktop application, compatible with Windows and MacOS

Automatic reports migration
Multiple reports can be migrated in one batch to save time and effort.
