Emission Tracker for SAP

Your business operations have a significant impact on the environment. But how effectively can you monitor and manage these impacts? Are you fully aware of your company's carbon footprint and the environmental consequences of your daily operations? In a world where sustainable practices are no longer optional but essential, understanding and controlling your environmental impact is critical.
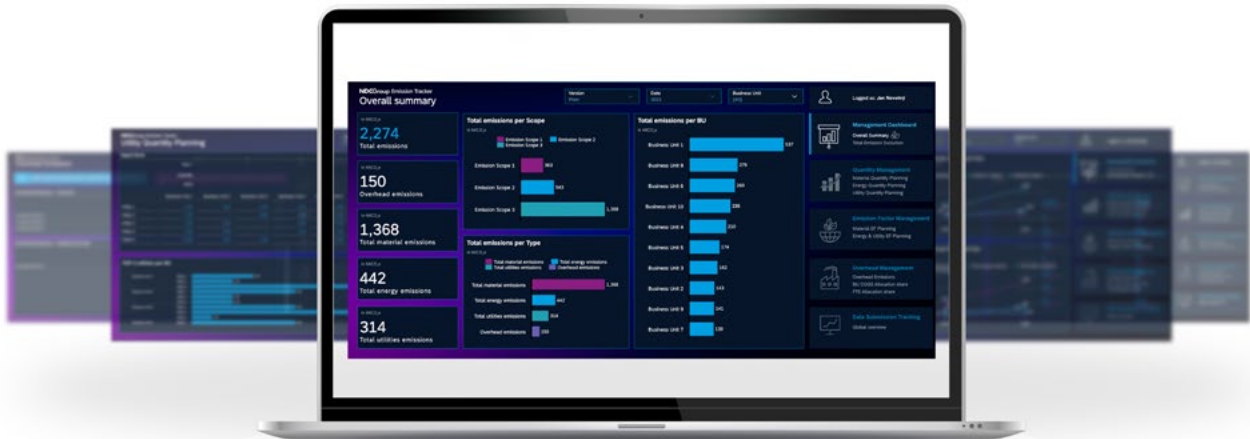

Fully works with **SAP** R/3, SAP S/4, SAP BW, Datasphere and non-SAP systems. The emission data can be provided through external databases, Excel imports, and embedded input forms.

Converts complex emissions data into accessible, visual representations, facilitating efficient **emissions calculation and management** for businesses.

Identifies and mitigates environmental risks, enhancing your **ESG compliance strategy**. Additionally helps with emission management for sustainable operational excellence.

Powered by **SAP** Analytics Cloud

Categorizes the data into **emissions groups** based on their specific source (Material, Energy, Utility).

If needed – the periodically (weekly/monthly) reports are created and sent automatically.

Fully **customizable** on the data collection and the desired **level of detail** which fits the customer's governance and reporting needs.

Single point of view of the data for ESG managers / Compliance Officers and getting all necessary **reports by few clicks**.

Streamlining Emissions Management: Your Path to ESG Excellence

NDC Emission Tracker delivers benefits for everyone

CEO / Executive committee

✓ *Strategic Alignment: Align business strategy with sustainability goals.*

✓ *Compliance Assurance: Ensures adherence to environmental regulations and standards.*

Develop a sustainable strategy
